

# HAWKINS ROAD CULVERT REPLACEMENT PROJECT

PIN: 9755.15

TOWN OF SANFORD  
NEW YORK

The Town of Sanford, in cooperation with the New York State Department of Transportation (NYSDOT), is in the process of developing preliminary plans for the replacement of the culvert carrying Hawkins Road over an unnamed stream immediately east of Huggins Road.

This project proposes to replace the existing 7' diameter steel culvert and laid-up stone wingwalls with a 12' diameter galvanized steel culvert and steel sheeting wingwalls. The existing culvert and wingwalls are in a deteriorated condition with less than 10 years of expected service life remaining. The existing culvert outlet is perched above the stream which impairs fish and other aquatic organism passage, this condition will be corrected during the replacement of the culvert.

During construction Hawkins Road in the vicinity of the project will be closed for approximately 8 weeks. All traffic will be detoured as shown on the detour plan on the back of this pamphlet. The proposed detour route, along NY Route 41 to N. Sanford Road (County Route 241) to Clark Road to Hawkins Road is 13.1 miles and can be driven in approximately 21 minutes. However, it is anticipated that affected residents will not have to drive the full detour. Residents on Hawkins Road to the east of the project will utilize the east half of the detour to access NY Route 41 south adding approximate 1.5 miles to their trip or access Route 88 via Walker and Perry Roads which also adds about 1.5 miles to their trip. It is anticipated residents to the west of the project will access NY Route 41 to travel north or south as they normally would.

The estimated construction cost for this project is approximately \$683,000. Construction is anticipated to be completed late in the 2024 construction season, but if permitting or material availability delays occur construction may be delayed until Spring 2025. This project is funded 100% by New York State Department of Transportation.

**A public information meeting about the project will be held during the regular board meeting on February 13th, 2024 at 7:00 PM at the Town of Sanford Town Hall.**

**This informational flyer is being distributed as part of the continuing efforts by NYSDOT, and the Town of Sanford to encourage public input into the development of transportation projects.**

**Questions and comments can be provided in person at the public information meeting or by using the attached comment form. Please provide comments to the Town Supervisor's office no later than February 27, 2024.**
